

## Durable and Secure Bike Parking Units

The BikeLid® is a patented form of secure, long-term bike parking that provides one or two bicycles superior protection from the elements, vandals and thieves.

# 2020 BikeLid®

### Standard Granite BikeLid®

**10-Year Limited Warranty**

Made in the USA, the standard BikeLid® is granite color and parks two bicycles with handlebars up to 26-inches wide. Single BikeLids are available and accommodate extra-wide handlebars up to 36-inches wide.

#### Durable with Graffiti Resistant Shell

BikeLid has a tough, UV and graffiti resistant polyethylene shell that protects bikes and components from the weather, theft and vandalism. The shell is further strengthened by a steel frame, which pivots on an axel, lift-assisted by an industrial compression spring.

#### Secure Double Lock

Bikes can be locked to the inner guide or frame, and the lid can be locked over the bike(s) using the cyclist's own lock(s). Optional pre-installed locks include keyed, combination or "on-demand" electronic.

#### Easy to Install

Units are delivered fully assembled and can be installed on any ground surface, from

earth to concrete, in a matter of minutes. The unit occupies less than 26 square feet for two bikes.

#### Sustainable and Ecological

Secure, long-term bike parking is the key to meeting sustainability goals and encouraging bicycle commuting, which in turn reduces air pollution, eases traffic congestion and reduces the need for car parking. BikeLids are made without environmentally harmful solvents and with 100% recyclable materials. The units qualify for LEED credits for bicycle facilities.

#### Approved by Security and Police

BikeLids meet homeland security requirements for monitoring without opening. The design deters storing non-bike property and discourages habitation.

# BikeLid® Options

### Standard Colors

### Full Vinyl Wrap

### Colors of the Rainbow or Full Wrap

BikeLids are available in granite and standard colors: yellow, green, blue, red, black, or to match custom PMS colors. Logos and graphics can also be added with mold-on graphics, vinyl graphics or a full vinyl wrap.

### Interior Gear Hooks

Aluminum, power coated steel or stainless-steel hooks for hanging coats and gear can be added to the BikeLid interior steel security hoop, inside the top of the interior steel frame.

### Window for Validation Ticket

An optional 3-inch by 4-inch validation window, with ticket clip, can be located on the front shoulder of the BikeLid. The window is available for vendors who will charge for secure bike parking on a pay-per-use basis and request users display a validation ticket.

### BikeLid Security Boot

Using the “lock boot”, agencies can prevent “rules of use abusers” or non-paying customers from retrieving their bike until the appropriate fees are paid.

### Traditional and Custom Bike Racks

Through our subsidiary, Tube Bending Northwest, BikeLid, LLC manufactures traditional and custom bike racks—including U and O (singles and ganged), wave and vertical—available in stainless steel, hot dipped galvanized or powder coated finishes.

# Compare Bicycle Parking

### Compare the features of BikeLid®, bike lockers, bike shelters and bike racks

Compared to “bike lockers” of any manufacture, BikeLid® is among the most durable and secure forms of Class 1, outdoor bike parking solutions, and it is among the easiest to install and maintain. BikeLid’s sculpted design protects both bikes and bike components. The unit comes fully assembled and installs to any ground surface in a matter of minutes. The raised shell allows for easy monitoring and cleaning, even when locked. Finally, BikeLid’s unique and appealing sculptural design turns heads, encourages use, and complements a wide variety of architectural styles.
